LANGUAGES

Russian (Fluent) · English (B2)

AI-first full-stack developer with **6+ years of commercial development**. I use coding agents, coordinate their work and connect tools through **MCP**. I review and test what ships. My technical base is **TypeScript, Vue / Nuxt, React / Next and Node.js**, from the interface to the API.

STACK

AI workflow Coding agents for scoped tasks. MCP for project tools and context. I review and test the changes.	Codex, Claude Code, MCP, Agent orchestration
Frontend Interfaces for web products, from a Figma layout to application state and API integration.	TypeScript, Vue, Nuxt, React, Next.js, Pinia, Tailwind, Vite, Astro, Electron
Backend APIs and background services that support the product.	Node, Nest, Express
Data Persistent data, queries, caching and job queues.	Postgres, Redis
Infra Repeatable builds, deployment and service configuration.	Docker, Nginx, GitHub Actions

EXPERIENCE

Yuke LLC / Full Stack Developer — APR 2026 - NOW

- AI-assisted product delivery with Codex, Claude Code and MCP, including code review and release checks. Browser extensions, Astro + Preact sites and a queued media API.
- Testing: about **3,000 automated tests** across the extensions in **Vitest** and **Playwright**; tag-driven CI builds version-stamped packages and submits them to the stores.

AI-assisted delivery · MCP · Codex · Claude Code · TypeScript · Vue

Freelancing / Full Stack Developer — JAN 2021 - NOW

- Independent client delivery from brief to production: web apps, browser extensions, desktop apps and Telegram Mini Apps.

TypeScript · Vue · Nuxt · React · Next · Astro

3205.team / Team Lead / Full-Stack — MAY 2025 - APR 2026

- Hands-on lead across two product teams: architecture, code review, AI workflows with n8n and MCP, and extension release pipelines.

TypeScript · Tech Lead · n8n · MCP · OpenAI · OpenRouter

3205.team / Full Stack Developer — JUL 2023 - MAY 2025

- Frontend-first full-stack work on browser extensions (~1M-user MV3 extension, 3 new ones at ~50k users), Nuxt/Next web products and their Electron desktop versions (~10k users), with Nest + Postgres APIs behind them.

TypeScript · Nuxt · Next · React · Nest · Postgres

Axiom Pro / Frontend Developer (outstaffed) — JUN 2024 - NOV 2024

- Delivered features in a US product through Axiom Pro: Vue / Laravel, legacy templates and APIs. Also maintained MySQL databases.

Vue · Pug · Laravel · Blade · PHP · MySQL

SOTNIKOV - Digital Studio / Full Stack Developer — JAN 2023 - MAY 2024

- Built client dashboards and a Telegram Mini Apps platform with Vue, React and Nest. Worked on payments, real-time connections and automated tests.

Vue 3 · React · TypeScript · TanStack Query · FSD · ECharts

365 Media Group / Frontend Developer — OCT 2022 - MAR 2023

- Sole frontend developer on a football-club merchandise store. Maintained Nuxt 2 / Vuex, fixed SSR issues and shipped through GitLab CI.

Vue 2 · Nuxt 2 · Vuex · SSR · Pug · SCSS

Quantum / Frontend Developer — APR 2022 - OCT 2022

- Built the workout constructor for a fitness platform using Vue 3, TypeScript and Pinia; worked with design and backend.

Vue 3 · Nuxt · TypeScript · Pinia · SPA · Tailwind

Geek Space / Frontend Developer — FEB 2021 - SEP 2021

- Built client landing pages and e-commerce sites in a seven-person studio, using Nuxt 2, Vuex and SCSS.

Vue 2 · Nuxt 2 · Vuex · SSR · SCSS · Pixel Perfect

IDE-AL Hyzmat / Full Stack Developer — JAN 2020 - FEB 2021

- Built and maintained a Nuxt 2 media product with a Node / Express API and MySQL. Later delivered a football-club web app from scratch.

Vue 2 · Nuxt 2 · SSR · Node · Express · MySQL

Alongside product work, I deliver client projects including e-Proof with an AI-assisted workflow: task scoping, implementation with coding agents, code review and behavior checks. The deliverables are web apps, browser extensions and their APIs.
